SKIN Report:

Targeted Treatments

If you have considered yourself "skin savvy" and want to restore your youthful state then read on, because aging gracefully just got a little easier...

Dr. Fiona Wright

The Scoop:

Dr. Fiona Wright is one of Dallas' most respected and sought after physicians in the field of cosmetics and beauty. Her landmark Laser and Rejuvenation Center is home to the international jet-setters and an A-List of Texans!

Skin M.D. and Beyond

DOES SHE OR DOESN'T SHE?

The latest 3D Non-Surgical Face Lift now holds the secret to rescue the face from gravity and aging, without anyone ever knowing. This 3D approach takes years off your appearance by combining laser/light treatments with a Liquid Thread Lift.

With our ever present economic concerns Fiona Wright M.D. has been pleased to offer this 3D rejuvenation to her patients as an alternative to the downtime, general anesthesia or expensive cost of traditional plastic surgery. Dr. Wright believes that patients can look their best at any age.

"I promote the idea of aging successfully. Many of my facial rejuvenation patients are in the 30-60 age range. They do not need or want a surgical face lift. By using minimally invasive procedures, maximum results can be achieved."

Dr. Wright uses the Palomar Lux Lift as the laser foundation for her rejuvenation regime. This treatment can achieve significant tightening of the sagging face, eye and neck skin. Her patients find the results amazing.

Known as the "IT" treatment for skin tightening, this Lux Lift has virtually no downtime and will

have you back in the social scene within 48 hours.

The Liquid Thread Lift is the artistic and accurate use of Botox and Facial Fillers to add volume and enhance lifting. "Botox isn't just for wrinkles anymore!" states Dr. Wright.

"Known as the "IT" treatment for skin tightening, the Lux Lift will have you back in the social scene in 48 hours!"

As we age our skin becomes less elastic and saggy. This may lead to a drooping of the eyebrow. Botox is used to correct this, giving your eyebrow a "brow lift". You can also choose the shape of the eyebrow you fancy. Botox can also be used to widen your eyes, giving a more refreshed look. Botox can

reshape the nose, remove aging lip lines, and can also be used for facial contouring / sculpting to give a softer angle at the jaw which is generally considered to be more feminine. Botox is a highly successful, non-surgical way to beautifully contour the face.

The Liquid Thread Lift requires an advanced technique in facial fillers. It incorporates placing the product in a lifting pattern. Columns of filler are laid in the skin much like using threads in a barbed suture face-lift. With the right selection of filler, and taking into account a patient's unique facial characteristics, volume can be added to lift the cheeks, turn out the lips to make them appear fuller and correct the volume loss around the eyes. It literally lifts the skin and tacks it back, anchoring it away from the dreaded folds of skin.

When trusting your face to a stranger, however, ensure that these advanced techniques are done only by an experienced physician. If the wrong amount of Botox is used or fillers are injected incorrectly, you may end up with an uneven brow, a droopy eyelid or crooked or fat face for months! But with the right technique and skill your aging gracefully just got a little easier!
