Eye Guide: EYES WIDE

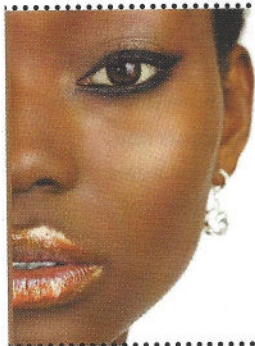

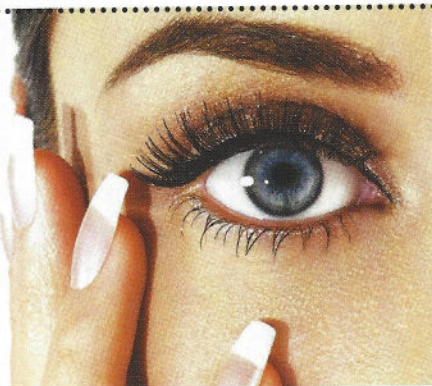

Secret weapons for youthful-looking eyes. Rejuvenate your eyes from fatigued to fabulous with these visual aids.

1 BROW LIFT!

A non-surgical brow lift is simple, reliable and one of the most requested cosmetic procedures Dr. Wright has from patients. With a few small injections, **Botox and Dysport** are famous for their ability to lessen frown lines and is fast becoming as well known for its ability to create a "lift" in the brow area. Yes, it's temporary, **but once you've experienced it, you'll love it.**

2 LIGHTEN UP!

To remove dark circles under the eyes you first need to know the cause. As the skin ages, blood vessels will show through, and prominent vessels will give the appearance of a bluish-purplish tinge to the lower eyelid. With the rubbing of your eyes and sun exposure, brown spots and pigmentation will also begin to appear. **Photofacials** are an excellent choice to address both of these concerns. After a series of 4-6 treatments you will start to see your youthful eyes again!

3 TIGHTEN UP!

The **3DEEP Skin Tightening** is the New Lunch Time Lift! This non-invasive RadioFrequency (RF) Device is specifically designed to stimulate new collagen growth and elasticity. Its unique **3DEEP** technology allows the physician to drive energy DEEP down in a controlled fashion, manipulating the energy into areas it normally would not travel. This DEEP heating causes the skin to contract and tighten, bringing fresh new skin to the surface, and long after the treatments are finished it will continue to create a youthful and taut skin appearance.

4 BROW & BEAUTY BAR

Shaping the Eyebrow isn't just about trimming, waxing or tweezing, it's about creating a look. A style. A feeling. It's about Creating Beauty. Through various techniques of tweezing, waxing, threading and brushing you can achieve your Signature Look. At a **Brow & Eye Lash Beauty Bar** you can have a brow clean up or a total re-shaping! Then finish your style with Lash and Brow Tinting and EyeLash Tabbing.

5 SMOOTH IT OUT!

To help correct the concerns of loose skin and wrinkles, you can resurface and build up collagen and elastin in the skin. **Non-Surgical Laser Resurfacing** is a very effective treatment method. The Palomar 1540 laser

treatment will improve skin texture, sun damage, pore size in as little as 4 treatments. With no reason to miss work- it will also smooth out fine lines around the eyes and mouth and can be used just about anywhere!

6 REVIVAL- EYES NBC Winner "Best in Eye Creams"

An important part of any eye rejuvenation program is the use of a good anti-aging eye cream. Whatever product you choose, it should provide skin tightening, reduce fine line wrinkling as well as diminish the appearance of dark circles. **Revival -Eyes** is a pharmaceutical grade product created by Dr. Wright to protect from the ravages of the sun and can help prevent further deterioration, correct discoloration, and help restore luster, brightness and a glowing appearance to sun damaged and dull skin.

"IT'S NEVER TOO LATE TO
TURN BACK THE CLOCK."

—Fiona Wright MD.

Dr. Fiona Wright, founder of Skin MD and Beyond has helped thousands of patients look younger, as she focuses solely on the expertise of non-surgical options for her patients' cosmetic concerns. By her successful blending together all of the latest skin care therapies, injectable treatments and cosmeceutical skin care products, it is no surprise that she treats an A-List of Texans! Dr. Wright has been featured in several NBC Health News Reports and is well known for her honest opinions and expertise.

7 BRUSH UP!

Summer is the perfect season to add a fresh pop of color to your makeup regime. Colorful eye shadows can make a statement and make your eyes stand out.

8 WAKE UP WITH MAKE UP!

Permanent makeup can enhance your life! Anyone who wants to improve their appearance and have the convenience of eyebrows and eyeliner that won't rub off, smudge or smear can enjoy the benefits of permanent make up.

9 LUXURIOUS LASHES WITH LATISSE.

This miracle solution stimulates your own lashes to grow **longer, thicker, and darker!** Dr. Wright, featured as the National Advisory Expert for Latisse on the NBC Evening News, is pleased to offer this easy to use at-home, once a day application. With 1.5 million bottles sold, see why celebrities Claire Danes and Brooke Shields find it to be Magic in a Bottle. Log on to www.Lattise.com and find out how this great product can benefit you!

10 EASY ON THE EYES!

As we age and lose volume about the eyes, it will elongate the lower eyelid, and lower the position of the lid to the cheek junction and expose the herniated fat pad of the lower lid. This will create a look of fatigue, create dark circles under the eyes, and the normal fat beneath the eyelid protrudes or pushes out on the eyelid and creates eye bags or puffy eyes. Though the bagginess under the eye cannot be removed without surgery, filling the tear trough with **safe effective fillers** can dramatically reduce the dark circles and hollows and improve the cosmetic appearance of the bagginess creating a more refreshed and younger look around the eye area.
