Q Dr. Wright, I've been coming to your clinic for many years and you seem to look better each year! What is your secret?

A While many may not like to celebrate the aging process, for me and many of my patients...we embrace it! Why, because time can stand still with just a little help. So read on to see how Father Time and Mother Nature can bring you Wisdom without Wrinkles!

I get a Beauty Brow Lift. This literally means that with Botox and Fillers I can "lift" the skin tissues above and around the eyebrows so that the natural eyebrow arch is higher – and without the need for surgery! By injecting Botox into the muscles that pull the eyebrows down, the muscles are weakened, and the eyebrows are lifted. With the addition of fillers such as Juvéderm and Restylane, the tail of the brow is lifted. This procedure can be refined over time as I age.

I get a Bright Eyes Beautification. Sunken eyes, dark circles and under-eye bags can make even a healthy and otherwise young individual look tired. With the help of a **soft tissue filler**, I fill the tear trough area and the benefit is immediate, with a look which is subtle but noticeable. People do not usually notice the change, except to tell me I look "rested" and youthful".

I get a Skin Firming Treatment. With no recovery time, minimal risk and a very natural-looking result – my approach to skin tightening for the eyes and face is **ThermiSMOOTH Radio-frequency Skin Tightening**. Radiofrequency technologies are the new age mantra to tighten the early stages of sagging skin around the neck and sides of the face to create a sharper jawline and a more youthful, rejuvenated appearance. With this most advanced technology, I find that it is one of the most desirable non-surgical treatments requested by patients in my clinic.

I Exfoliate and Oxygenate Routinely. Exfoliation is one of the most important secrets of a youthful appearance! It will keep your skin soft and glowing, help keep your pores from clogging and keep acne under control. As well, it helps with uneven skin tone and keeps wrinkles in check. To rejuvenate my skin, I exfoliate monthly with a **DermaSweep Dermal Infusion** and finish with a nourishing **Oxygen Facial**.

As menopause continues and estrogen levels drop, creases and crinkles creep into my skin. But, with these simple steps I follow to erase the signs of aging and boost my overall skin health, I am not afraid of aging and I love the confidence that it brings.
