

## Skin Tightening Treatment *that REALLY WORKS!*

Fiona Wright, MD

**M**any companies state their lasers will tighten the skin, improve texture and that patients will love the results. It has been my experience that most machines over promise and under produce. With most lasers, patients will find some improvement, but the real test is if they feel the results that they received would justify the money they would have to spend.

I asked my patients to test several of the leading lasers for facial skin tightening and decide what really works and if it is a machine worth paying for. The results came in and my patients loved the results from the **Palomar Lux Lift**. The Lux Lift is a simple in-office procedure that requires no anesthesia, minimal downtime and takes only 45 minutes!

—Dr. Wright

The **Palomar Lux Lift** is a laser that creates many microchannels to penetrate into the dermis far below the outer most skin layer causing collagen contraction and remodeling. The outer surface of the skin is cooled by the patented sapphire tip, eliminating pain and leaving the outermost layer of skin intact while the deeper tissues heal and tighten.

There is negligible downtime (1-2 days of slight swelling) and no reason to miss work. Skin tightening for the jowls and nasal folds, and fine lines around the eyes and mouth benefit most from this treatment, but it can be used most anywhere!

**The Palomar Lux Lift is the “it” treatment for looking younger – and Dr. Wright is one of the first physicians in North Texas to offer it to her patients.**

Patients find the results amazing and received unsolicited comments from friends and family that their skin looks tighter, more lifted, younger and refreshed.

Dr. Wright spends a considerable amount of time researching and learning about new developments in this ever-advancing industry.

“Dr. Wright is always on the cutting edge of technology and I trust her

completely. All of her procedures are carefully tested by herself and her volunteer patients. **She offers only procedures that work – and I am proof!”** states Tere H., a patient of Dr. Wright.

What sets Dr. Fiona Wright apart from other cosmetic physicians is her artistic eye and her commitment to offering the best procedures to her patients, which create a natural, more youthful non-surgical appearance.

Dr. Wright is the only physician in Dallas-Fort Worth to be awarded the coveted Diamond Elite Status with Botox Cosmetic and Facial Fillers and with this, is **ranked #1 in North Texas for Non-Surgical Cosmetic Enhancements.**

Resembling a high-end luxury spa, Skin MD & Beyond provides a variety of non-invasive rejuvenation treatments with uncompromising service and hospitality.

**“I believe in giving my patients informed choices. The range of treatments I provide allow people to select the level of results, amount of downtime and cost that suits them best. My goal is to exceed their expectations,”** says Dr. Wright.
